Advisory Circular

Subject: NOISE CERTIFICATION HANDBOOK

Date: 3/23/88
Initiated by: AEE-3

AC No: 36-4B
Change:

FOREWORD

The aim of this technical manual is to promote uniformity of implementation of the noise certification requirements of Part 36 of the Federal Aviation Regulations (FAR) by presenting test, analysis, and documentation procedures for subsonic turbojet airplanes that have been determined by the FAA to be technically acceptable for demonstrating compliance with that regulation. Where appropriate, FAA policy governing such certifications is reviewed.

Norman H. Plummer
Director of Environment and Energy

CONTENTS

Page

CHAPTER 1. GENERAL..... 1

1. Purpose..... 1

2. Cancellation..... 1

3. Background..... 1

4. Objective..... 1

5. Noise Demonstrations..... 2

a. Flight Tests..... 2
b. Supplemental Noise Demonstration Methods..... 2
c. Changes to Noise Certification Levels for Derived Versions..... 2

6. Witnessing of Tests..... 2

7. [Reserved]..... 3 (and 4)

CHAPTER 2. NOISE DEMONSTRATION FLIGHT TEST UNDER PART 36 APPENDICES A AND B..... 5

8. Test Conditions..... 5

a. Test Site Characteristics..... 5
b. Atmospheric Conditions..... 5

9. Flight Procedures..... 6

a. Selection of a Flight Test Noise Demonstration Method..... 6
b. Nominal Conditions for Development of a Reference Noise-Power-Distance Data Base (NPD)..... 7
c. Measurements at Non-reference Points..... 7
d. Test Day Flight Procedures..... 10
e. Target Test Conditions..... 11

10. Measurements..... 11

a. Sound Measurements..... 12
b. Airplane Position and Performance..... 13

11. Sound Measurement System Specifications..... 14

12. Analysis System..... 14

Page

13. Sound Measurement Equipment Calibrations and System Checks 15

a. Frequency Response 15
b. Amplitude 15

14. Computation of Effective Perceived Noise Level (EPNL) 15

a. Data Processing 16
b. Test Day EPNL 17
c. Normalized EPNL 17
d. Duration Correction for Simplified Adjustment Method 17
e. Reference EPNL Evaluation 18

CHAPTER 3. SUPPLEMENTAL NOISE DEMONSTRATION METHODS UNDER PART 36 APPENDICES A AND B 21

15. Alternative Methods 21

16. Technical Considerations 22

a. Examples of Demonstration Applications 22
b. Noise Source Characteristics 22
c. Noise Increment Derivation Using Common Demonstration Method 22
d. Supplemental Test Data Compatibility 24
e. Component Noise Sources 24
f. Noise Increments Caused by Nacelle Acoustic Treatment Changes 24

17. Static Engine Tests 24

a. Limits on the Projection of Static to Flight Data 25
b. Test Site Requirements 25
c. Test Hardware 25
d. Inflow Control Devices 25
e. ICD Calibration 26
f. Acoustic Shadowing 26
g. Microphone Locations 28
h. Engine Power Test Conditions 28
i. Data Analysis System Compatibility 28
j. Data Acquisition, Analysis and Normalization 28

Page

18. Projection of Static Engine Data to Airplane Flight Conditions 29

a. Engine Installation Effects 29
b. Normalization to Reference Conditions 32
c. Engine Component Noise Source Separation 32
d. Noise Source Position Effects 33
e. Engine Flight Conditions 34
f. Noise Source Motion Effects 34
g. Airframe Noise Component 35
h. Extrapolation to Airplane Flight Path 36
i. Total Noise Spectra 36
j. EPNL Computations 37
k. Noise Increment Computations 37

19. Supplemental Flight Tests 37

20. Supplemental Analyses 37

a. Noise Increments Derived from an Approved NPD 38
b. Analytical Modeling of Noise Components 38

21. Supplemental Component Tests ..... 39 (and 40)

22. Methods for Demonstrating No Acoustical Change ..... 39 (and 40)

CHAPTER 4. DOCUMENTATION REQUIREMENTS 41

23. General 41

24. Noise Compliance Demonstration Plan 41

a. Introduction 41
b. Test Item 41
c. Type of Noise Demonstration Method 41
d. Test Description 41
e. Data Acquisition Systems 41
f. Data Analyses and Normalization Procedures 41
g. Equivalencies 41

25. Noise Certification Compliance Report 42

a. Introduction 42
b. Airplane, Engine, and Nacelle Descriptions 42
c. Airplane Performance at Reference Conditions 42
d. Certification Noise Levels 42
e. Noise Certification Test Results 42

26. DER Witness Informal Report..... 43

27. Noise Control Act Findings..... 43

28. Airplane Flight Manuals..... 44

a. General Requirements for Limitation..... 44
b. AFM Maximum Certificated Weight Limits..... 45
c. Multiple Noise Certifications..... 45
d. Landing Flap Restriction..... 45
e. Optional Engine Thrust Ratings (Derate and Reduced Thrust)..... 46
f. Noise Level Information..... 46

29. ICAO Certifications..... 46

APPENDIX 1. NOISE DATA CORRECTIONS FOR TESTS AT HIGH ALTITUDE TEST SITES..... 1

1. Introduction..... 1
2. Jet Noise Source Correction..... 1

APPENDIX 2. GUIDANCE MATERIAL ON METHODS TO ACCOUNT FOR THE EFFECTS OF BACKGROUND NOISE ON AIRPLANE RECORDED NOISE DATA..... 1

1. Introduction..... 1
2. Background Noise..... 1
3. Correction Procedures..... 3

APPENDIX 3. GUIDANCE MATERIAL ON METHODS TO IDENTIFY PSEUDOTONES/FICTITIOUS TONES IN AIRPLANE RECORDED NOISE DATA..... 1

1. Introduction..... 1
2. Spectral Irregularities..... 1
3. Methods for Identification of Pseudotones/Fictitious Tones..... 2

APPENDIX 4. COMPUTATION OF EFFECTIVE PERCEIVED NOISE LEVEL (EPNL)..... 1 (and 2)

APPENDIX 5. GUIDANCE MATERIAL ON METHODS TO CALCULATE CONFIDENCE INTERVALS..... 1

1. Introduction..... 1
2. Confidence Interval for Clustered Data..... 1
3. Confidence Interval for Regression Curve..... 2
4. Confidence Interval for Pooled Data Sets..... 5
