Supplemental Type Certificate

Number SE4315NM

This certificate, issued to Allen E. Timberman

certifies that the change in the type design for the following product with the limitations and conditions therefor as specified hereon meets the airworthiness requirements of Part 13 *of the* Civil Air *Regulations.*

Original Product — Type Certificate Number: E-252

Make: Continental

Model: O-200-A

Description of Type Design Change: Replacement of the original engine oil screen with an external mounted full flow oil adapter and spin-on filter in accordance with FAA sealed copies of Timberman Master Drawing List No. AT-3-200-DL, dated March 31, 1988, and Installation Instructions No. OF-16-0200, dated March 31, 1988, or later FAA Approved revisions.

Limitations and Conditions: Approval of this change in type design applies to the above model Continental O-200-A engines. This approval should not be extended to other engines of this model on which previously approved modifications are incorporated unless it is determined that the relationship between this change and any of those other previously approved modifications, including changes in type design, will introduce no adverse effect upon the airworthiness of that aircraft. (See Continuation Sheet page 3)

This certificate and the supporting data which is the basis for approval shall remain in effect until surrendered, suspended, revoked, or a termination date is otherwise established by the Administrator of the Federal Aviation Administration.

Date of application: February 24, 1988

Date of issuance: November 21, 1988

Date reissued: July 30, 1993

Date amended: July 30, 1993

By direction of the Administrator

Supplemental Type Certificate

(Continuation Sheet)

Number SE4315NM

Limitations and Conditions (continued):

SUPPLEMENTAL TYPE CERTIFICATE HOLDER: Allen E. Timberman

The limitations and conditions of Type Certificate Data Sheet Number E-252 for Continental Model O-200-A engine remain applicable.

The installation of an engine modified in accordance with this STC will require a determination by the installer that no interference is created with existing aircraft system.

Engines equipped with the Timberman spin-on oil filter must continue to be maintained in accordance with the original engine manufacturers maintenance instructions, except as indicated on an FAA sealed copy of Timberman Maintenance Instructions No. OF-15-0200-MI, dated March 31, 1988, or later FAA approved revision, a copy of which must be added to the engine maintenance records.

A copy of this STC must be included in the permanent records of each engine which is modified in accordance with this STC.

This STC covers the fabrication of all parts associated with this oil filter installation and also the physical modification of the Continental O-200-A engines. Associated STC No. SA4318NM covers the use of this modified engine on specific airplane models, and also covers the mounting of the oil filter, filter base, and mounting plate on the firewalls of these airplanes.

- END -

Any alteration of this certificate is punishable by a fine of not exceeding $1,000, or imprisonment not exceeding 3 years, or both.
