1. INTRODUCTION

This document is the FAA Approved Model List (AML) for STC SA02738CH, installing the L3 Communications Avionics Systems ESI-1000 Electronic Standby Instrument System.

Revisions to the AML must be coordinated between the STC holder and the Chicago Aircraft Certification Office (ACO) and require FAA approval.

This AML is subject to the following limitations and assumptions:

The ESI-1000 requires 28 VDC power. For twelve volt aircraft, it will be necessary to install a voltage converter that provides an output of a minimum of 15 watts of power at 28 VDC. The converter must be bussed to a power source that ensures a minimum of 30 minutes operation in the event that the primary attitude and air data sources are lost. Separate approval must be obtained for installation of the 28 VDC power source.

The installation must be completed in accordance with Appendix C of the L-3 ESI-1000 Installation Manual referenced in Section 5 of the Master Data List. Any deviation from the information contained in the Master Data List or Appendix C of the Installation Manual will require further engineering review and approval by the responsible certification authority.

Installation of the optional MAG-3100 should be in a location free from magnetic interference. The approved design data contained in Appendix C of the ESI-1000 Installation Manual assumes the magnetometer will be installed in the fuselage area of the aircraft and attached to secondary, metal structure. Installation to primary structure, composite surfaces or in the wings will require further engineering review and approval by the responsible certification authority for structural, damage tolerance and direct effect of lightning aspects.

2. CERTIFICATION BASIS

Based on 14 CFR §§ 21.101 and 21.115, and the FAA policy for significant changes in FAA Order 8110.48, the certification basis for the aircraft identified in the approved model list for this STC with the installation of the L-3 Communications ESI-1000 Electronic Standby Instrument is as follows:

a. The type certification basis for the aircraft identified in the approved model list for this STC is shown In Table 1 for parts not changed or not affected by this change.

b. The type certification basis for the parts changed or affected by this change since the reference date of application , October 28, 2008, is based upon Part 23 as amended by Amendment 23-55. Based on 14 CFR §§ 21.101 and 21.115, and the FAA policy for significant changes in FAA Order 8110.48, the certification basis for this modification was determined to be:
