## APPROVED SERIAL NUMBER LIST

### BHI H60 HELICOPTERS, LLC REPORT NO. BHI-204 TC0012DE

The following aircraft were found to be eligible and Type Certificated under Type Certificate R0012DE. To be eligible for certification, an aircraft must first be inspected by the Type Certificate holder or his authorized representative. If the aircraft is found to conform to this TCDS and all applicable drawings, reports and bulletins, authorization for use of this Type Certificate will be issued to that aircraft by the Type Certificate holder. FAA form 8130-6, Application for Airworthiness Certificate, may be submitted by the aircraft owner to the nearest MIDO at this time. The serial number will be added to this report by the holder of TC R0012DE only after the FAA inspector has completed his own conformity inspection. Upon acceptance of this revision by the ACO servicing this Type Certificate, the MIDO inspector will then issue an Airworthiness Certificate.

Upon satisfactory completion of a conformity inspection by the Type Certificate Holder or his authorized representative, the serialized BHI H60 Helicopters, LLC. Data Plate (shown on page 6) will be issued to the subject aircraft. All information required on the data plate shall be submitted prior to issuance, with exception to certification date. At issuance of the Airworthiness Certificate by the FAA, that date shall be entered in the block entitled "Date Certificated" on the data plate by stamping or permanent etching.
