

CHAPTER 17. ACCOMPLISH DESIGNATION/ISSUE CERTIFICATES AS AN AIRMAN CERTIFICATION REPRESENTATIVE (ACR) EMPLOYED SOLELY BY A FLIGHT INSTRUCTOR REFRESHER CLINIC SPONSOR

SECTION 1. BACKGROUND

1. OBJECTIVE. The objective of this task is to complete the procedures for designation as an airman certification representative (ACR) employed by the sponsor of a Federal Aviation Administration (FAA)-approved flight instructor refresher clinic (FIRC), and to issue airman certificates in accordance with that authorization. Successful completion of this task results in designation as an ACR and the appropriate exercise of the ACR's authority.

2. GENERAL. Sponsors of FAA-approved FIRCs may request the designation of an ACR authorized to issue flight instructor certificate renewals to eligible course graduates of the approved FIRC.

A. ACR Privileges and Limitations. An ACR is authorized to accept applications for the renewal of a valid flight instructor certificate from FAA-approved FIRC graduates. The ACR may only accept an application from a holder of a flight instructor certificate who graduated from a FIRC that is named on the ACR's Certificate of Authority and Certificate of Designation.

(1) After reviewing the applicant's attendance/training record and eligibility, an ACR is authorized to renew the flight instructor certificate of a FIRC graduate who meets the requirements of Title 14 of the Code of Federal Regulations (14 CFR) part 61, § 61.197(a)(2)(iii).

(2) An ACR is NOT authorized to conduct any knowledge or practical tests in connection with ACR duties.

B. Record of Applications. An ACR shall maintain a record of all certificate renewal applications processed, including those not accepted and returned to the applicant.

(1) If the ACR cannot act upon an application for the renewal of a flight instructor certificate, the ACR shall return the application to the applicant and advise the applicant of the reasons for non-acceptance.

(2) The ACR shall maintain a record of all certificate renewal applications processed for at least the preceding 12 months.

3. SELECTION OF ACRs. Only the holder of an FAA-approved FIRC training course outline (TCO) may sponsor an applicant for ACR designation. Final approval of the TCO is a prerequisite for an ACR designation. The sponsor of an FAA-approved FIRC may request ACR designation for one or more responsible members or employees of that organization by submitting a letter to the jurisdictional Flight Standards District Office (FSDO) where the applicant's principal business office is located. The ACR designation will be issued by the jurisdictional FSDO with the notification and concurrence from the jurisdictional Flight Standards regional office and the General Aviation and Commercial Division, AFS-800. If the jurisdictional Flight Standards regional office elects to deny the ACR candidate's application, a letter of explanation shall be sent to the jurisdictional FSDO and AFS-800.

A. Prerequisites. The sponsor requesting an ACR designation shall provide the following information:

- The original date of FAA approval of the sponsor to conduct the FIRC
- The number of programs given in the 12-month period immediately preceding the request for an ACR designation
- The number of attendees issued graduation certificates, the number of graduation certificates denied, and the reasons for the denials
- The number and location of programs scheduled and the expected number of attendees for the 12-month period immediately following the date of request for designation

B. Application. An applicant for an ACR designation must submit FAA Form 8710-10, National Examiner Board—Designated Pilot Examiner

Candidate Application, to the supervising FSDO. The FSDO will review the candidate's qualifications and background in pilot school or related administrative and/or management experience and consider the attitude of the candidate's FIRC sponsor regarding ACR responsibilities.

NOTE: Do not send the application to the National Examiner Board (NEB).

C. General Eligibility and Experience Requirements. A candidate employed only by a FIRC sponsor who applies for designation as an ACR:

- (1) Must be at least 21 years of age.
- (2) Is not required to be a U.S. citizen.
- (3) Must hold at least a commercial pilot certificate.
- (4) Must hold a flight instructor certificate with at least one aircraft category rating, or hold a ground instructor certificate with an advanced and instrument rating.
- (5) Must have a good record as a pilot in regard to accidents, incidents, and violations.
- (6) Must have a reputation for integrity and dependability in the industry and the community. Applicants who have had their pilot certificate revoked for falsification or forgery are ineligible. Under unusual circumstances, the regional flight standards division manager may grant a waiver.
- (7) Must have been employed as a chief flight instructor, assistant chief flight instructor, or ground instructor of an FAA-approved FIRC, or have held a management or administrative position in a FIRC for at least 12 months immediately preceding application for designation as an ACR.
- (8) Must have a written recommendation from the FIRC sponsor when the candidate is a person other than the sponsor.

D. Alternative Experience. The holder of a current designated pilot examiner (DPE) designation meets all eligibility and experience requirements for designation as an ACR. A current DPE is authorized to perform ACR duties and responsibilities (for any airman certificate or rating) without further need for approval or authorization from the supervising FSDO.

E. Exceptions. A recommendation for the designation of an ACR who does not meet all of the

applicable eligibility and experience requirements is forwarded to the jurisdictional Regional FAA Flight Standards Division Manager for approval before being sent to the FAA's Manager, General Aviation and Commercial Division, AFS-800, for concurrence. The recommendation should include a statement of all special circumstances affecting the designation. The jurisdictional Regional FAA Flight Standards Division Manager's approval and the FAA General Aviation and Commercial Division, AFS-800, concurrence is required before a Certificate of Authority may be issued to the ACR candidate.

F. Examination of the Candidate. After determining that the applicant meets the eligibility and experience requirements, an inspector will conduct an oral examination to determine the candidate's knowledge of:

- Airman certification requirements
- The standards for processing applications submitted by FIRC graduates for renewal of flight instructor certificates

G. Training. If the inspector deems the candidate's knowledge adequate for effective administration of the designation, the ASI will instruct the candidate on:

- Procedures to be used in reviewing flight instructor renewal applications for proper completion
- Procedures for evaluating the application and the applicant's training attendance record to determine eligibility for renewal under the provisions of 14 CFR part 61, § 61.197(c)

H. Designation. The FSDO issues the new ACR a Certificate of Designation, a Certificate of Authority, and an initial supply of official materials appropriate to the authorization.

- An inspector will instruct the ACR on how to correctly complete, check, and forward certification files to the FSDO
- Integrated Airman Certification and Rating (IACRA) certification files may be sent directly to the FAA Airmen Certification Branch, AFS-760

4. CERTIFICATION OF GRADUATES. When the ACR issues a flight instructor certificate renewal, the examiner shall complete and certify the appropriate information on the reverse side of FAA Form 8710-1,

Airman Certificate and/or Rating Application. (See Figure 17-1.)

A. Temporary Airman Certificate. The ACR shall use the guidance in chapter 5, section 1, paragraphs 25 and 26, as applicable, to prepare FAA Form 8060-4, Temporary Airman Certificate.

B. Certification File. The ACR should use the guidance in chapter 5, section 1, paragraph 23, to complete the certification file. The examiner shall clearly indicate on FAA Form 8710-1 that the applicant has been certificated as a graduate of an FAA-approved FIRC.

C. A Special Emphasis Action for ACR's Review. FAA Form 8710-1 must be completed in ink or typewritten and signed by the graduate. Per 14 CFR § 61.39(a)(7), the graduate must complete Section III, Record of Pilot Time. As a special emphasis item, the examiner must review the aeronautical experience recorded on FAA Form 8710-1 and in the logbook/training record, including on applications for a renewal of a flight instructor certificate/rating(s).

5. INSPECTIONS FOR COMPETENCY. The FSDO may inspect the ACR for competency at any time deemed appropriate. Inspections may consist of an inspector observing the ACR conduct flight instructor certificate renewals, or may involve an in-depth review of the FIRC records to confirm that the records support certification functions already completed by the ACR. If an inspection indicates an apparent deficiency in standards or judgment, the FSDO will initiate educational or remedial action to correct the deficiency.

6. DURATION OF DESIGNATION. An ACR's Certificate of Authority expires 12 calendar-months after the date of issuance. However, the Certificate of Authority is valid only as long as the FIRC approval on which it is based remains valid and the ACR remains in the employ of that FIRC sponsor.

A. Renewal of Designation. The ACR shall apply for renewal at least 60 days prior to the expiration date of the designation. The ACR may renew the designation by following the same procedures used for initial application. The application must include:

(1) The ACR's current Certificate of Authority; and

(2) A record of all flight instructor certificate renewal applications processed since the issuance or last renewal of the ACR designation. The record must show the name of the applicant, the certificate and ratings applied for, the date, and the disposition of the application.

(3) The ACR shall schedule a personal interview with the inspector renewing the designation to review examiner performance and procedures.

(4) ACRs are not required to attend an Initial or Recurrent Pilot Examiner Standardization Seminar. However, they are encouraged to attend these seminars on a voluntary basis. If the ACR elects to attend an Initial or Recurrent Pilot Examiner Standardization Seminar, the ACR is responsible for all travel, per diem, and course costs.

B. Prerequisites for Renewal. The following prerequisites are required for renewal of an ACR designation.

(1) The FAA approval of the FIRC, which is the basis for the ACR designation, shall be current and valid. If the approval is due for renewal, it must be approved for renewal at the time the ACR applies for renewal.

(2) The FSDO must find that continuation of the ACR designation is justified to provide service to graduates of the FIRC and that renewal of the designation is in the FAA's interest based on the workload involved.

C. Reinstatement. The FSDO may not accept airman certification files from the holder of an expired ACR designation. However, at the discretion of the supervising FSDO, the sponsor of a FIRC may request the reinstatement of an expired ACR designation, using the same procedures as for initial application.

7. TERMINATION OR NONRENEWAL. The information and guidance in chapter 1, section 4, paragraphs 4 and 5, regarding delegation and rescission of an examiner authorization and termination or non-renewal of a designation, applies to all designations (including ACR designations).

[THIS PAGE INTENTIONALLY LEFT BLANK]

SECTION 2. PROCEDURES

1. PREREQUISITES AND COORDINATION REQUIREMENTS.

A. Prerequisites. This task requires knowledge of FAA certification procedures and the eligibility and experience criteria for designation as an ACR employed solely by an FAA-approved FIRC.

B. Coordination. This task will require coordination between the jurisdictional FSDO, the jurisdictional flight standards regional office, and AFS-800.

2. REFERENCES, FORMS, AND JOB AIDS.

A. References.

- Parts 61, 141, and 183
- FIRC's FAA-approved TCO

B. Forms.

- FAA Form 8710-10, National Examiner Board—Designated Pilot Examiner Candidate Application
- FAA Form 8710-1, Airman Certificate and/or Rating Application
- FAA Form 8060-4, Temporary Airman Certificate
- FAA Form 8430-9, Certificate of Authority
- FAA Form 8000-5, Certificate of Designation

C. Job Aids.

- Figure 17-1, Designated Examiner's Report Section of FAA Form 8710-1, Airman Certificate and/or Rating Application, Completed by an ACR for a FIRC

3. PROCEDURES. Accomplish the following:

A. Application. The applicant must complete an FAA Form 8710-10. The completed application should be submitted to the supervising FSDO.

NOTE: Do not send the application to the NEB.

(1) Complete an oral examination with an inspector.

(2) Complete training on evaluation of airman applications and procedures for processing airman certification files.

(3) The jurisdictional FSDO shall review the applicant's FAA Form 8710-10 and send a copy of the completed form to notify the jurisdictional Flight Standards Regional Office, Airman Certification Branch, AFS-760, and General Aviation and Commercial Division, AFS-800.

B. Process Certification Files. Evaluate applications for renewal of a valid flight instructor certificate and issue temporary certificates, as appropriate.

(1) Return any application that cannot be acted upon to the applicant. Advise the applicant of the reasons for non-acceptance.

(2) Make a record of all flight instructor renewal applications processed, including those denied.

C. Renewal. Apply for renewal before the expiration date of the examiner's current designation.

(1) Present the ACR's current Certificate of Authority and a record of all applications processed since the last renewal to the designating FSDO.

(2) Schedule a personal interview with the inspector renewing the designation to discuss examiner performance and procedures.

4. TASK OUTCOMES. Successful completion of this task results in designation as an ACR and appropriate exercise of the ACR's authority.

5. FUTURE ACTIVITIES.

- Accomplishment of inspections by the FSDO
- Renewal of the ACR designation
