Mr. D. J. Long
Aero Commander Division
Rockwell-Standard Corporation
P. O. Box 1098
Norman, Oklahoma 73070

Dear Mr. Long:

Reference is made to your letter 601/G/719, May 25, 1964, regarding the certification basis of your Model 1121 airplane.

The use of a demand oxygen system for the crew and a constant flow system for the passengers is sufficient for compliance with CAR 4b.651 if other requirements of that regulation are met. The certification basis for the 1121, as described by previous correspondence, is hereby amended to permit use of a constant flow oxygen system in the passenger compartment.

Sincerely yours,

H. H. Slaughter
Chief, Engineering and
Manufacturing Branch
Flight Standards Division
