*certifies that the change in the type design for the following product with the limitations and conditions therefor as specified hereon meets the airworthiness requirements of Part * of the Federal Aviation Regulations. *See applicable Type Certificate Data Sheet (TCDS) for certification basis*

Original Product Type Certificate Number: **See attached FAA Approved Model List (AML)

Make: *for list of approved aircraft models and applicable

Model: *airworthiness regulations.

Description of Type Design Change: Installation of ignition switch in accordance with Mark Givans' Installation Manual, document number MGIM2004, Revision A, dated August 12, 2004, or later FAA approved revision. This modification removes the existing ignition switch and replaces it with a different type of ignition switch that is isolated from both battery and generator electrical circuits (these circuits retain their existing independent switches).

Limitations and Conditions: Compatibility of this design change with previously approved modifications must be determined by the installer. The installation should not be incorporated in any airplane unless it is determined that the interrelationship between this installation and any previously approved configuration will not introduce any adverse effect upon the airworthiness of the aircraft. The approval of this modification applies to the above-noted airplane model series only. A copy of this STC must be included in the permanent records of the modified airplane. If the holder agrees to permit another person to use this certificate to alter the product, the holder shall give the other person written evidence of that permission.

This certificate and the supporting data which is the basis for approval shall remain in effect until surrendered, suspended, revoked or a termination date is otherwise established by the Administrator of the Federal Aviation Administration.
