This rotorcraft employs Night Vision Imaging System lighting, commonly named NVIS that has been certified to ensure the rotorcraft is compatible with Night Vision Goggles (NVG). For this reason, interior and exterior modifications that add or change systems that emit or reflect light have the potential to alter or change the NVIS lighting vs. NVG compatibility. Compatibility of this design with subsequent modifications must be determined by the installer. The determination of compatibility with modifications that emit or reflect light may require a re-evaluation by an FAA Aircraft Certification Office. A copy of this certificate and the FAA-approved Rotorcraft Flight Manual Supplement FMS-119004-6, Revision G, FAA approved February 1, 2016, or later FAA approved revision, must be maintained as part of the permanent records for the modified rotorcraft.
