Model:

aircraft models and applicable airworthiness regulations

Description of the Type Design Change: Installation of a Supplemental Lighting System; manufactured and installed in accordance with Aviation Specialties Unlimited master drawing list (MDL) as listed on the AML. Maintained in accordance with the instructions for continued airworthiness (ICA) as listed on the AML. Operated in accordance with the rotorcraft flight manual supplement (RFMS) as listed on the AML.

Limitations and Conditions: Approval of this change in type design applies to the rotorcraft listed on AML SR02464SE and only to the specific serial numbers listed on the MDL for each model. This rotorcraft employs Night Vision Imaging System Lighting, commonly named NVIS that has been certified to ensure the rotorcraft is compatible with Night Vision Goggles (NVG). For this reason interior and exterior modifications that add or change systems that emit or reflect light have the potential to alter or change the NVIS lighting vs. NVG compatibility. Compatibility of this design with subsequent modifications must be determined by the installer. The determination of compatibility with modifications that emit or reflect light may require a re-evaluation by an FAA Aircraft Certification Office. A copy of this certificate, AML SR02464SE, the ICA, and the RFMS, must be maintained as part of the permanent records for the modified rotorcraft.

If the holder agrees to permit another person to use this certificate to alter the product, the holder shall give the other person written evidence of that permission.

This certificate and the supporting data which is the basis for approval shall remain in effect until surrendered, suspended, revoked, or a termination date is otherwise established by the Administrator of the Federal Aviation Administration.
