Limitations and Conditions: (Continued)

2. If the holder agrees to permit another person to use this certificate to alter the product, the holder shall give the other person written evidence of that permission.
3. Other military modifications may have been installed on the aircraft which are not part of this Supplemental Type Certificate. These installations do not conform to FAA Approved type design, but may have been accepted by the military Airworthiness Authority for operation by the United States Department of Defense. These installations are shown on FAA Form 8130-2, Conformity Certificate – Military Aircraft, dated April 26, 2005 or later. All non-conformances to FAA approved type design must be removed, or FAA approved, prior to returning the aircraft to civil registration with a standard airworthiness certificate.
4. This approval is limited to Boeing Models 747-E4A (Serial Numbers 20682, 20683, and 20684) and 747-E4B (Serial Number 20949).
5. Prior installations are required of the following Supplemental Type Certificates:
 - a. STC ST00529WI-D, INMARSAT
 - b. STC ST09661SC, FMS; EFIS; GPS
 - c. STC ST09504SC, VHF Com Upgrade
 - d. STC ST09662SC, TCAS; TA/VSI; IFF Mode S
 - e. STC ST09663SC, TAWS
6. This STC approval is for the existing configuration as defined by the approved drawing list and later FAA approved minor change which have been reviewed and approved by the appropriate DAS-501296-CE staff members.
7. Installation of this STC modification must be accomplished at the Boeing Wichita Repair Station PI2R084L utilizing Boeing Planning Paper as Installation Instructions. FAA approved changes to this STC may be installed at locations other than Boeing Wichita Repair Station if the changes are prepared in the form of kit engineering and include adequate installation instructions.
