3. The ICA must be made available to the operator at the time of installation.
4. Installation of this NVIS system does not authorize the operator to use NVGs. If the type of operation requires an operational authorization, the operator must coordinate with the FAA or with the responsible aviation authority to obtain this authorization.
5. Once an airplane is modified with this STC, any future interior or exterior modification that adds or changes systems that emit or reflect light has the potential to adversely affect NVG compatibility and may require a reevaluation by the response FAA Aircraft Certification Office.
6. Compatibility of this design with previously approved modifications must be determined by the installer.

Certification Basis:

Based on 14 CFR § 21.115 and § 21.101, and the FAA policy for design changes that are identified as not significant in FAA Order 8110.48, the certification basis for the Cessna 208B aircraft with the installation of the NVIS / NVG Compatible Lighting System is as follows:

- a. The type certification basis for parts **not changed or not affected** by the change is shown on TCDS A37CE.
- b. The modification certification basis for parts **changed or affected** by the change since the reference application date, December 13, 2014, is based upon part 23 as amended by Amendment 23-62 as follows:
