

APPENDIX 4.  
FLIGHT STANDARDS INFORMATION BULLETIN (FSIB) INDEX  
FOR AIRWORTHINESS (FSAW)

Flight Standards Information Bulletins serve the function of alerting the field inspector on information that may require immediate action, special emphasis programs, or concerns that are time critical or temporary. The intent of the FSAW is to provide the Flight Standards Service a means to quickly disseminate information to the Flight Standards Community. It is not intended to replace the handbook bulletin (HBAW); however, it may be incorporated or retained into handbook material at a later date. The bulletins' expiration dates have been changed to NONE; they will not expire until they have been incorporated into the handbook, superceded by another bulletin or order, or canceled if no longer applicable.

Please keep this index as the first page of Appendix 4 in FAA Order 8300.10, Airworthiness Inspector's Handbook.

FSIBs are distributed to Flight Standards facilities via FAA electronic mail and are maintained electronically using Microsoft Word (.doc) formats. FSAWs are also available on the following internet site:
