DEPARTMENT OF TRANSPORTATION
FEDERAL AVIATION ADMINISTRATION

TYPE CERTIFICATE DATA SHEET NO. A00010WI

This data sheet, which is part of Type Certificate No. A00010WI, prescribes conditions and limitations under which the product for which the Type Certificate was issued meets the airworthiness requirements of the Federal Aviation Regulations.

Type Certificate Holder: Textron Aviation Inc.
One Cessna Boulevard
Wichita, Kansas 67215

Type Certificate Holder Record: Raytheon Aircraft Company transferred to Hawker Beechcraft Corporation on March 26, 2007
Hawker Beechcraft Corporation transferred to Beechcraft Corporation on April 12, 2013.
Beechcraft Corporation transferred to Textron Aviation Inc. on October 12, 2016.

I. MODEL 390 (PREMIER I) (NORMAL CATEGORY) APPROVED MARCH 23, 2001

Engine Two Williams-Rolls, Inc. International FJ44-2A Turbofans

Fuel Commercial kerosene JET A, JET A-1, per ASTM-D-1655, or JP-8 per MIL-T-83133 (Limited use Av-gas 100LL per ASTM D910. Limited to 5,000 gallons per engine between major periodic inspections. Operation is limited to 10,000 feet and below with the electric boost pumps on per AFM procedures).

Fuels not containing icing inhibitors must have MIL-I-27686 or MIL-I-85470 fuel system icing inhibitor added in amounts of not less than 0.10% nor more than 0.15% by volume. Minimum fuel icing inhibitor content during refueling is 0.10% by volume.
Dupont Stadis 450 anti-static additive or equivalent is permitted to bring fuel up to 300 conductive units, but not to exceed 1 part per million.
SOHIO Biobor JF biocide additive or equivalent is permitted at a concentration not to exceed 20 parts per million (270 ppm total additive) of elemental boron.

Engine Limits
Static Sea Level Takeoff (5 minutes) static thrust, sea level 2300 lbs.
Standard Day Maximum Continuous static thrust, sea level 2300 lbs.
Maximum permissible engine rotor (Operating speed)
Low pressure rotor, N1 (30 seconds) 106.4%
Low pressure rotor, N1 105.2%
Low pressure rotor, N2 98.8%
I. **MODEL 390** (cont’d)

*See Specification BS25190, BS25191 and BS25192 or maintenance manual for rigging tolerances.

Certification Basis

3. 14 CFR part 34 as amended by Amendments 34-1 through 34-3.
4. Title 49 U.S.C. Section 44715
5. Special Conditions as follows:

   (a) 23-096-SC and 23-096A-SC-additional requirements for:
       Performance, stalling speed, takeoff speeds, takeoff performance, accelerate-stop distance, takeoff path, takeoff distance and takeoff run, takeoff flight path, climb, climb all engines operating, takeoff climb one engine inoperative, climb one engine inoperative, reference landing approach speed, landing distance, balked landing, longitudinal control, minimum control speed, control during landings, trim, stability, static longitudinal stability, demonstration of static longitudinal stability, static directional and lateral stability, dynamic stability, wings level stall, turning flight and accelerated turning stalls, stall warning, vibration and buffeting, high speed characteristics, out-of-trim characteristics, flutter, takeoff warning system, engine fire extinguishing system, fire extinguishing agents, extinguishing agent containers, fire extinguishing system materials, airspeed indicating system, static pressure system, operating limitations and information, airspeed limitations, minimum control speed, minimum flight crew, markings and placards, airspeed indicator, airplane flight manual and approved manual material, operating limitations, operating procedures, and performance information. Effects of Contamination on Natural Laminar Flow Airfoils.inoperative, reference landing approach speed, landing distance, balked landing, longitudinal control, minimum control speed, minimum flight crew, markings and placards, airspeed indicator, airplane flight manual and approved manual material, operating limitations, operating procedures, and performance information. Effects of Contamination on Natural Laminar Flow Airfoils.

   (b) 23-122-SC-HIRF
1. **MODEL 390** (cont’d)

Certification Basis (cont’d)

(6) Exemptions as follows:

(a) No. 6558 for landing gear loads from §§ 23.25, 23.29, 23.235, 23.235, 23.471, 23.473, 23.477, 23.479, 23.481, 23.483, 23.485, 23.493, 23.499, 23.723, 23.725, 23.726, 23.727, 23.959, 23.1583(c)(1) and (2), Appendix C23.1, Appendix D23.1. Compliance has been shown for the additional requirements as specified in the exemption and identified as paragraphs 1 through 25. Any change in type design must also show compliance with these additional requirements.

(b) No. 7190 partial exemption from the requirements of 23.181(b).

(7) Equivalent Level of Safety Findings as follows:

(a) No. ACE-99-11 §23.853(a) for small parts that would not contribute significantly to the propagation of fire. The compensating feature for this equivalent level of safety was compliance with the vertical burn requirements of CFR 14 Part 23, Appendix F for larger interior furnishings and panels.

(b) No. ACE-00-02 §§23.1305(a)(2), (a)(3), (c)(2), (c)(5) and 23.1549 (a) through for direct reading digital only displays.

(c) No. ACE-05-04 to use 1-g stall speeds rather than traditional Vsmin stall speed as the reference datum for regulatory compliance.

(8) Compliance with ice protection has been demonstrated in accordance with 14 CFR 23.1419.

Production Certificate No. PC-8 Delegation Option Manufacturing No. DOA-230339-CE.

**Equipment**

The basic required equipment as prescribed in applicable airworthiness regulations (see Certification Basis) must be installed in the aircraft for certification. (See Limitations Section of FAA Approved Airplane Flight Manual for Kinds of Operation Equipment List)
NOTE 1. Current weight and balance data, loading information and a list of equipment included in empty weight must be provided for each airplane at the time of original certification.
Basic empty weight includes unusable fuel of 105.2 lbs for gravity fill (12.5 lbs undrainable); 109.2 for single point refueling (16.5 lbs undrainable).

For aircraft serial numbers RB-75 and after, or prior aircraft that embody Kit No. 390-9200:
(a) Basic empty weight includes unusable fuel of 45.4 lbs for gravity fill (14.4 lbs undrainable);
49.4 lbs for single point refueling (18.4 lbs undrainable).
(b) Basic empty weight includes engine oil of 17.2 lbs.
(c) Basic empty weight includes hydraulic fluid of 18.1 lbs.

NOTE 2. All placards required in the FAA Approved Flight Manual P/N 390-590001-3A-1 or later FAA Approved version must be installed in the appropriate location.

NOTE 3. The aircraft must be operated in accordance with FAA Approved Airplane Flight Manual P/N 390-590001-3A1 or later FAA Approved version.

NOTE 4. The Model 390 is approved for the single seating installation shown in the AFM. Removal, alteration or relocation of seats, restraint systems, cabinets or tables is subject to approval by the Wichita ACO.

NOTE 5. See Model 390 Maintenance Manual, P/N 390-590001-15, Chapter 4, “Airworthiness Limitations” for inspections, mandatory life information and other requirements for continued airworthiness. These requirements may not be changed without approval by the Wichita ACO.

NOTE 6. The Model 390 has been approved for Group Reduced Vertical Separation Minimum (RVSM) as described below:
(a) Serials RB-70 and after.
(b) Serials RB-2, RB-3, RB-46, RB-51, RB-60, RB-66 when modified by kit 390-3205.
(c) Serials RB-4 through RB-69 with Kits 390-3205 and 390-3203 installed, exceptions are outlined in notes 2., 4., and 5.
(d) Currently non-group RVSM approved serials RB-27, RB-35, which have been modified by kit 390-3203 and 390-3205.
(e) Currently non-group RVSM approved serials RB-21, RB-29, RB-48, and RB-10, which have been modified by kit 390-3205.

Final certification for RVSM operations must be obtained by the operator from the local FAA Flight Standards District Office (FSDO) or Certificate Management Office (CMO).

NOTE 7. The following serial numbers were manufactured under Raytheon Aircraft Corporation: RB-1 through RB-188.

NOTE 8. The following serial numbers were manufactured under the Hawker Beechcraft Corporation: RB-189 through RB-295.

----END----
